Quality Policy

“Quality at all levels”

Braswell Precision Inc. is a Precision Machine Shop that strives to consistently satisfy customer requirements by meeting or exceeding customer expectations. This is accomplished through manufacturing components of the highest quality and the continual improvement of our Quality Management system with total company involvement. Quality will be incorporated into every level of production with total customer satisfaction being our end goal.

Scope / Mission Statement taking us into the future

Braswell Precision will provide the highest possible quality products at exceptional value to the customer by understanding and acknowledging their needs and requirements. Using technologies, motivated personnel, Company Integrity and working in a team environment internally and externally with the customer will allow BPI to reduce or eliminate any or all customer concerns. Additionally, providing a clean and safe work environment for employees to build their skills and experience, technical upgrades, and continuous company improvement will allow BPI to complete any task as efficiently as possible.

Vision Statement for the Future

Braswell Precision Inc. (BPI) inspires to become a Leading Precision Machine Part manufacturer of Aerospace, Defense, and Scientific components.
